$$\begin{array}{rcl} A & = & (p \vee q) \supset r \\ B & = & p \vee (q \supset r) \end{array}$$

$$\frac{\vdash ; : q \rightarrow_0 q; p, r \quad \text{Ax}}{q \Rightarrow p; p, q, r} \text{Refl}$$

$$\frac{}{q \Rightarrow p \vee q; p, r} R^V$$

$$\frac{}{q; ; r \rightarrow_0 r; p} \text{Ax}$$

$$L\supset$$

$$\frac{q; ; A \rightarrow_0 r; p \quad L\supset_0}{q, A \Rightarrow r; p} L\supset_0$$

$$\frac{}{A \Rightarrow q \supset r; p} R^>$$

$$\frac{A \Rightarrow p; q \supset r \quad \text{Rest}}{A \Rightarrow p; q \supset r} R^V$$

$$R^>$$

$$\frac{A \Rightarrow p; q \supset r \quad R^V}{A \Rightarrow B; \cdot} R^>$$

$$R^>$$

$$\frac{\cdot \Rightarrow A \supset B; \cdot}{\cdot \Rightarrow A \supset B; \cdot} R^>$$

Translation in NC

$$\begin{array}{c}
A = (p \vee q) \supset r \\
B = p \vee (q \supset r)
\end{array}$$

$\frac{}{q, p^\perp, q^\perp, r^\perp, (q \supset r)^\perp, (p \vee q)^\perp, B^\perp, A \vdash q \downarrow} \text{Id}$
 $\frac{}{q, p^\perp, q^\perp, r^\perp, (q \supset r)^\perp, (p \vee q)^\perp, B^\perp, A \vdash q \uparrow} \uparrow$
 $\frac{}{q, p^\perp, q^\perp, r^\perp, (q \supset r)^\perp, (p \vee q)^\perp, B^\perp, A \vdash p \uparrow} \perp_E$
 $\frac{\text{Id}}{q, p^\perp, r^\perp, (q \supset r)^\perp, B^\perp, A \vdash A \downarrow} \quad \frac{q, p^\perp, r^\perp, (q \supset r)^\perp, B^\perp, A \vdash p \vee q \uparrow}{q, p^\perp, r^\perp, (q \supset r)^\perp, B^\perp, A \vdash p \vee q \uparrow} \vee^+ I$
 $\frac{q, p^\perp, r^\perp, (q \supset r)^\perp, B^\perp, A \vdash r \downarrow}{q, p^\perp, r^\perp, (q \supset r)^\perp, B^\perp, A \vdash r \downarrow} \suparrow$
 $\frac{q, p^\perp, r^\perp, (q \supset r)^\perp, B^\perp, A \vdash r \uparrow}{q, p^\perp, (q \supset r)^\perp, B^\perp, A \vdash r \uparrow} \perp_E$
 $\frac{}{p^\perp, (q \supset r)^\perp, B^\perp, A \vdash q \supset r \uparrow} \supset I$
 $\frac{(q \supset r)^\perp, B^\perp, A \vdash p \uparrow}{A \vdash B \uparrow} \vee^+ I$
 $\frac{A \vdash B \uparrow}{\therefore \vdash A \supset B \uparrow} \supset I$

The rule

$$\frac{B^\perp, \Gamma \vdash A\uparrow}{A \vee B\uparrow} \vee^+_I$$

can be derived in **NC** in few steps.

ation in MJc

$$\begin{aligned}
&= p \supset B &= p \supset ((a \supset c) \wedge ((b \supset c) \wedge (a \vee b))) \\
&= B_0 \wedge B_1 &= (a \supset c) \wedge ((b \supset c) \wedge (a \vee b)) \\
&= a \supset c \\
&= C_0 \wedge C_1 &= (b \supset c) \wedge (a \vee b) \\
&= b \supset c \\
&= a \vee b \\
&= p \wedge A &= p \wedge (p \supset ((a \supset c) \wedge ((b \supset c) \wedge (a \vee b))))
\end{aligned}$$

ation of substitutions

$$\begin{aligned}
&= p \supset B &= p \supset ((a \supset c) \wedge ((b \supset c) \wedge (a \vee b))) \\
&= B_0 \wedge B_1 &= (a \supset c) \wedge ((b \supset c) \wedge (a \vee b)) \\
&= a \supset c \\
&= C_0 \wedge C_1 &= (b \supset c) \wedge (a \vee b) \\
&= b \supset c \\
&= a \vee b \\
&= p \wedge A &= p \wedge (p \supset ((a \supset c) \wedge ((b \supset c) \wedge (a \vee b))))
\end{aligned}$$

$$\begin{array}{c}
\frac{\text{, } c^\perp, H; b \xrightarrow{0} b}{\text{, } c^\perp, H \Rightarrow b} \text{LC}_0 \\
\frac{\text{, } c^\perp, H \Rightarrow b}{\text{, } c^\perp, H \Rightarrow b} \text{RC} \quad \frac{\text{, } b, a^\perp, c^\perp, H; c \xrightarrow{0} c}{\text{, } b, a^\perp, c^\perp, H; C_0 \rightarrow_0 c} \text{Ax} \\
